

U5 Writing —Medical Abstract II

Medical English Writing | 医学摘要写作（二）

最后修订：2026 年 6 月 30 日

考点速览

- 不同期刊的摘要写作要求（NEJM, Science, IMJ）
- 时态和语态的使用规则
- 摘要各部分的句型模板（Introduction / Objective / Methods / Results / Conclusion）
- 写作步骤与好摘要的 5 个属性
- 关键词选择与 MeSH

不同期刊对摘要的要求

期刊	字数限制	类型	结构
NEJM	≤250 words	Structured	Background, Methods, Results, Conclusion（4 段）
Science	≤125 words	Non-structured	Background → Results → Conclusion
IMJ	≤250 words	Structured	Background, Aims, Methods, Results, Conclusions

时态规则（Tense Rules）

部分	时态	说明
Background	Present tense	陈述已知事实
Methods	Past tense	描述已完成的操作
Results	Past tense	报告已获得的发现
Conclusion	Present tense	陈述普遍性的结论

语态：主动语态和被动语态均可使用，方法部分常用被动语态。

各部分句型模板

Objective（目的）：To / In order to + investigate / examine / determine / explore / evaluate / assess / reveal / clarify / elucidate... / The purpose/objective/aim of this study is/was to... / We attempted to... / We conducted a study to...

Methods（方法）：

- 概述：Using / employing / By / with / through... / ...was used/applied to do...
- 选择：Inclusion/Exclusion criteria were... / ...were randomized into / randomly allocated to / divided into...
- 易混淆动词：perform/conduct/undertake（医生执行手术）vs. undergo（病人接受手术）
- 测量动词：measure（直接读取）/ detect（检测存在）/ determine（计算确定）

Results（结果）：

- 陈述：The results showed / indicated / revealed / suggested that... / It was found/observed that...
- 变化：increased/decreased/reduced/dropped/declined/lowered to/by...
- 关联：was closely related to / strongly associated with / inversely correlated with

- 比较: There was a significant difference between... / No significant difference was found
- 高频词: respectively (分别), statistically (统计学上), significant/significantly, markedly (显著地), negative/positive (阴性/阳性)

Conclusion (结论): The authors/we conclude/suggest/propose/recommend that... / These findings suggest/indicate/demonstrate/confirm/support that...

Prospecting (展望): It can be expected that... / ...should be further explored/investigated / Further study is to be done on...

好摘要的 5 个属性

属性	英文	要求
完整性	Complete	独立成文 (stand-alone), 包含所有主要部分
简洁性	Concise	无过度冗长, 无空洞短语 (empty phrases)
清晰性	Clear	可读性强, 组织良好, 避免行话
连贯性	Cohesive	各部分流畅衔接, 按时间顺序 (chronological order)
一致性	Consistent	时态、语态、平行结构一致

写作步骤

1. 重读全文 → 2. 找出 purpose, methods, scope, results, conclusions → 3. 利用标题和大纲作为撰写指南 → 4. 不看原文写出初稿 → 5. 修改 (改进组织、删除冗余、补充遗漏、精简措辞、修正语法) → 6. 打印终稿再读一遍

关键词选择 & MeSH

技巧: 从读者角度思考, 包含主题近义词 (heart diseases → stroke, circulatory system, blood), 术语变体 (spine disorders → spinal cord, vertebral column, backbone), 缩写全称也应包含

MeSH (Medical Subject Headings):医学主题词表,用于规范化关键词。MeSH on demand: <https://www.nlm.nih.gov>

常见改错类型

1. “contrasts sharply with 46.9%” → “contrasts sharply with that of 46.9%” (缺少比较对象代词 that)
2. “in those complicated emphysema” → “in those with emphysema” (缺少介词)
3. “good results were about 77.6%” → “Good results were obtained in about 77.6%” (句式不完整)
4. “average 32 months” → “with an average of 32 months” (缺少介词结构)
